

Tal Israeli, Full-stack Developer

Email: contact@talisrae.li | Mobile: [+972 53 284 1514](tel:+972532841514) | LinkedIn: [in/talIsraeli](https://www.linkedin.com/in/talIsraeli) | Portfolio: talisrae.li

*Experienced self-taught **.NET Core** and **React** full-stack developer. Skilled in developing high-performance applications, performing technical evaluations, and designing solutions for business needs.*

Practical Experience

2023 – Present: Maintainer, Collaborator, Full-stack Developer, “Maakaf”, Israeli Open-Source Community

- Maintains two projects: one developed in Preact; and one developed in Angular, serverless Azure Functions and MongoDB.
- Collaborates as an experienced full-stack developer in various community open-source projects.
- Shares knowledge in software development, software architect, and open-source project maintenance

2022 – Present: Founder, Full-stack Developer, “Someone to Argue With”, Online Chat Platform

- [“Someone to Argue With”](#) handles **26,000+ daily users**, with **4,000+ concurrent users**.
- The platform was spotlighted in many newspapers such as [ABC News](#), [Mako](#), [TheMarker](#), [Kipa News](#).
- Founded, developed and implemented an Azure cloud-based social platform that connects strangers into a real-time text or video conversation. Available in both the [browser](#) and [Google Play](#).
- Developed in React, Redux Toolkit; ASP.NET Core, SignalR, and Entity Framework Core for REST API.
- Used a machine learning model on client video stream to ensure there’s no violation of policy.
- Manages SQL Server database with **700,000+ entries**, ensuring performance is high traffic compatible.
- Proactively identifies and addresses bugs and high-priority changes, optimizing code quality by regularly cleaning code, improving performance, monitoring and fixing errors.

2017 – 2020:

- Created text-based webpage [search engine](#) (“Google” replica) on AWS with ASP.NET and SQL Server.
- Collaborated with game development teams, participated in international [game jam events](#) with Unity.

Education

2018 – 2020: “Computer Science – Academia and Industry”, Weizmann Institute of Science. (Grade: 100)

2017 – 2020: Bagrut Certificate, Computer Science, Brenner High-school. (Grade: 100)

Military Service, Volunteering

2020 – 2023: Combat Intelligence Collection Solider, IDF

- Gained valuable experience in teamwork, leadership, communication, and time management.

2018 – 2019: Travel Guide and Administration Assistant, “Green Horizons”, JNF – KKL

Programming Languages, Skills

- Frontend technologies: React, Redux Toolkit, Preact, Angular, HTML, CSS, SASS, JavaScript, TypeScript.
- Backend technologies: ASP.NET Core / C#, SignalR, Entity Framework Core, Node.js, Azure Functions.
- Databases: Microsoft SQL Server, MongoDB.
- Cloud platforms, CI/CD: Azure, Amazon Web Services (AWS), GitHub Actions.
- Excellent analytical and problem-solving skills, with technical evaluations & solution design experience.
- Strong communication and collaboration skills, with a proactive and results-driven mindset.

Languages: Hebrew (native), English (fluent).
